1. Good morning everyone!

My name is Shrawani Raut. I am currently pursuing my final year of Computer Engineering at Sinhgad Academy of Engineering, Pune.

During my academic journey, I have learned various technical and computer-related skills. I am familiar with MS Excel, PowerPoint, Microsoft Word and Google Docs. I also have basic knowledge of programming and database management.

Apart from technical skills, I consider myself a quick learner, responsible and a good team player. I enjoy learning new things and improving my knowledge.

My career goal is to work in a project management or management-related field where I can use my communication, organizational and problem-solving skills.

I want to gain practical experience, learn from new opportunities and build a successful career.

Thank you
